13 Key Assumptions

All model drivers — change these to run projections

OPERATIONS	PRICING & COSTS	OPERATING EXPENSES
Production Capacity **1,00,000 units/yr**	Base Selling Price **₹1,200 / unit**	Fixed SG&A (Base) **120,00,000**
Base Utilisation **50%**	Annual Price Escalation **6% p.a.**	SG&A Growth **3% p.a.**
Annual Util. Increase **+5% p.a.**	Base Material / Unit **₹500 (+5% p.a.)**	Sales Commission **3% of Revenue**
Units Sold **80% of available**	Labour / Unit **₹250 (+7% p.a.)**	Tax Rate **30%**

CAPITAL EXPENDITURE	DEBT	WORKING CAPITAL
Initial Equipment **₹20,00,000 (FY2025)**	Bank Loan **₹20,00,000**	Debtor Days **45 days (Stable)**
Additional Capex **₹10,00,000 (FY2027)**	Interest Rate **12% p.a.**	Creditor Days **41 days (Stable)**
Depreciation Rate **10% WDV**	Repayment Period **5 years (equal)**	Inventory Days **58 days (Stable)**
	Annual Repayment **₹4,00,000**	

14 Risk Factors & Observations

Severity-ranked watchpoints and strategic considerations

HIGH	Inventory Build-Risk	Closing inventory reaches ₹1.14 Cr by FY2028 — representing ~58% of COGS. A slowdown in sales conversion or demand softness could lock significant capital in stock. Management should monitor sell-through rates closely and adjust production scheduling accordingly.
HIGH	Price Escalation Assumption	6% annual price escalation is a critical driver of margin expansion. This assumption must be validated against market elasticity, competitive pricing, and commercial arrangements. A actual price growth falls to 3% FY2028 revenue drops to ₹6.47 Cr (base: ₹7.08 Cr).
MEDIUM	Input Cost Inflation	Raw material costs escalate at 5% and labour at 7% annually. If actual inflation exceeds these assumptions — particularly given commodity price volatility — gross margins could compress meaningfully. The 6% price escalation provides a buffer but may not fully offset a cost shock.
MEDIUM	Early-Year Cash Dependency	The model shows negative FCFF in FY2025 (-₹44.5L) due to heavy initial capex and working capital absorption. Equity contribution of 20L and the 12L bank loan are essential to bridge this gap. Any delay in sales conversion would pressure the early-year liquidity position.
POSITIVE	Strong Cash Generation from FY2028	From FY2028 the business turns strongly FCFF positive at ₹3.12 Cr, accelerating to ₹3.40 Cr by FY2029. This provides significant flexibility for accelerated debt repayment, additional capex investment, or enhanced returns to shareholders.
POSITIVE	Debt-Free Balance Sheet by FY2028	Full loan retirement by end of FY2028 eliminates interest obligations and reduces financial risk materially. The balance sheet becomes entirely equity-funded, strengthening creditworthiness and providing a clean foundation for the next phase of growth.
